Re: Yosemite Creek Superfund Site, San Francisco, CA
Response to 104(e) Information Request

Dear Mr. Whitenack:

This letter responds to the October 15, 2009 request for information ("RFI") of the United States Environmental Protection Agency ("EPA") directed to Hewlett-Packard Company ("HP") regarding the Yosemite Creek Superfund site (the "Site").

As a preliminary matter, we note that your letter was not received by either Mark Hurd, CEO and President of HP, or my partner Christopher Roe, although each are listed as addressees on the RFI. Nevertheless, subject to both the general and specific objections noted below, and without waiving these or other available objections or privileges, HP submits the following in response to the RFI and in accordance with the January 11, 2010 due date that EPA has established with Mr. Nicholas van Aelstyn for this response.

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 2

I. GENERAL RESPONSIVE STATEMENT AND OBJECTIONS

The RFI focuses primarily on seeking information pertaining to HP's use of or connection with the former Bay Area Drum Superfund Site ("BAD Site"). Accordingly, we believe it would be helpful to EPA for HP to provide herein both the background and results of the previous investigation undertaken by HP regarding the BAD Site. In 1992, in response to an investigation and request by the California Department of Toxic Substances Control ("DTSC"), HP reviewed its records and interviewed appropriate individuals regarding the BAD Site. HP provided DTSC with the results of those efforts in a July 30, 1992 response to DTSC's information request ("HP Response"). EPA may already possess the HP Response as part of the DTSC files regarding the BAD Site. However, we are enclosing for your ease of reference the HP Response (See Exhibit A). HP is also enclosing with this response the documents that served as a basis for, or were referenced in, HP's Response (See Exhibit B).

The HP Response was the result of an extensive, comprehensive search conducted in 1992 by HP. The search was broad, and was not limited to the specific HP facilities that were identified in BAD Site documents possessed by DTSC.

As reflected in the HP Response, internal records were located as a result of HP's search that, together with the records HP received from DTSC, reflected transactions between three HP locations and the BAD Site. As reported in HP's Response, the HP internal records were consistent with the BAD Site documents from DTSC as to the number of drums involved in transactions between HP and BAD. HP's conclusion in 1992 from its internal search was that, pursuant to the standard procedures of HP, drums from HP would have been emptied and rinsed before delivery to the BAD Site. No information has been discovered by HP that HP ever sent any oils, hazardous substances, waste materials, or anything other than drums that were considered empty to the BAD Site.

As EPA may be aware, a great deal of time and effort was expended by DTSC and the potentially responsible parties in the 1990s, thoroughly investigating each PRP's transactions with BAD. As a result of, and in reliance on, these efforts, the parties were able to work out settlements among themselves and with the state of California.

The RFI, as it relates to HP, seeks detailed information about a great number of HP facilities over a very long period of time. Virtually all of this information would be unhelpful and irrelevant to EPA's investigation of the alleged contamination at the Site, even if HP were to still possess and to undertake the enormous task to find such information among the great number of files that exist within the organization. For example, HP understands the theory that

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 3

materials migrated through sewer lines and sewer overflow from the BAD Site to the Yosemite Creek Site. However, the RFI seeks detailed information regarding facilities that no past inquiries ever linked to the BAD Site, including *all* HP facilities in California from the 1940s through the 1980s and *all* HP facilities outside California that shipped drums or other containers to *any* location in the entire state of California in the same period. The scope of this request, especially as applied to a company that has had numerous locations and operations in California and beyond, is extremely broad and unduly burdensome and there is no reason to believe it would lead to any additional relevant information.

EPA's requests seek a great deal of information that is not relevant to the BAD Site, and we believe this information is therefore beyond the scope of EPA's authority as set forth in Section 104(e)(2)(A) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), which provides that EPA may request information "relevant to . . . [t]he identification, nature, and quantity of materials which have been . . . transported to a . . . facility". Among other things, the RFI seeks information regarding "COCs", defined as "any of the contaminants of concern at the Site and includes: lead, zinc, mercury, dichlorodiphenyl-trichloroethane ("DDT"), chlordane, dieldrin, and polychlorinated biphenyls ("PCBs")." Certain RFI requests also seek information regarding hazardous substances beyond the defined "COCs" term. We believe that these requests are overly broad and are not relevant to the Site. As previously noted, the drums shipped by HP to the BAD Site would have been emptied and rinsed before delivery.

HP fully responded to a government mandated investigation more than fifteen years ago (much closer in time to BAD's operations) and uncovered no transactions with BAD other than those that were reflected in documents in the DTSC files. HP is happy to provide the non-privileged information and documents that it has been able to find as a result of prior investigations with regard to HP transactions with the BAD Site, and it is doing so with this response. The information being provided includes HP internal documents that served as the basis for HP's Response but, upon information and belief, were not requested by DTSC or provided to DTSC in 1992.

The focus of the responses below is on the three HP locations that were identified in HP's internal search in 1992, in the records that DTSC obtained from BAD, and which are the only HP locations that, pursuant to a comprehensive, good faith search, were ever linked to transactions with BAD. To the extent EPA has information or records of connections between the BAD Site and HP facility that are not consistent with this General Responsive Statement and Objections or any of the responses below, HP requests that it be provided with such information

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 4

and documents. We would be happy to consider any such additional information and to supplement this response if necessary.

HP asserts the following general privileges, protections and objections with respect to the RFI and each information request therein.

1. HP asserts all privileges and protections it has in regard to the documents and other information sought by EPA, including the attorney-client privilege, the attorney work product doctrine, all privileges and protections related to materials generated in anticipation of litigation, the settlement communication protection, trade secret protections, and any other privilege or protection available to it under law.
2. HP asserts that the information being provided herein is confidential business information within the meaning of 40 C.F.R. § 2.203(b), and is therefore subject to the protections set forth in 40 C.F.R. Part 2, Subpart B.
3. HP objects to Instruction 4 to the extent it seeks to require HP, if information responsive to the RFI is not in its possession, custody, or control, to identify any and all persons from whom such information "may be obtained." This request is overly broad and HP is not otherwise in a position to identify all such persons who may have such information.
4. HP objects to Instruction 5 on the ground that EPA has no authority to impose a continuing obligation on HP to supplement these responses. HP will, of course, comply with any lawful future requests that are within EPA's authority.
5. HP objects to Instruction 6 in that it purports to require HP to seek and collect information and documents in the possession, custody or control of individuals not within the custody or control of HP. EPA lacks the authority to require HP to seek information not in its possession, custody or control.
6. HP objects to the RFI's definition of "document" or "documents" in Definition 3 to the extent it extends to documents not in HP's possession, custody, or control. HP disclaims any responsibility to search for, locate, and/or provide EPA copies of any documents "known by HP to exist" but not in HP's possession, custody, or control.
7. HP objects to the RFI's definition of "Facility" or "Facilities" in Definition 4 because the terms are overbroad to the extent that they extend to facilities with no connection to either the Site or the BAD Site. Moreover, the term "Facilities" as defined in the RFI is vague and confusing as the term is defined as having separate meanings in Definition 4 and Request No. 3.

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 5

8. HP objects to the definition of "identify" in Definition 7 to the extent that the definition encompasses home addresses of natural persons. Subject to this objection, current HP employees and any other natural persons are identified by name and corporate address. HP requests that any contacts with HP employees identified in these responses or the related documents be initiated through the undersigned.

9. HP objects to Definition 14 because the terms are overbroad and it is not possible for HP to answer questions on behalf of all the persons and entities identified therein. Notwithstanding this objection, and without waiving it, HP has undertaken a diligent and good faith effort to locate and furnish documents and information in its possession, custody, and control that are responsive to the RFI.

II. RESPONSES TO OCTOBER 15, 2009 EPA INFORMATION REQUESTS

1. *Describe generally the nature of the business conducted by HP and identify the products manufactured, formulated, or prepared by HP throughout its history of operations.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome as it has manufactured many types of products since the 1940s. By way of further answer and without waiving its objections, HP responds that it is or has been in the business of developing and manufacturing electronic devices and products, as well as computing, imaging and printing products, and storage, and networking hardware, software and services.

2. *Provide the name (or other identifier) and address of any facilities where HP carried out operations between 1940 and 1988 (the "Relevant Time Period") and that:*

- a. ever shipped drums or other containers to the BAD Site for recycling, cleaning, reuse, disposal, or sale.*
- b. are/were located in California (excluding locations where ONLY clerical/office work was performed);*
- c. are/were located outside of California and shipped any drums or other containers to California for recycling, cleaning, reuse, disposal, or sale (for drums and containers that were shipped to California for sale, include in your response only transactions where the drums and containers themselves were an object of the*

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 6

sale, not transactions where the sole object of the sale was useful product contained in a drum or other container).

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, in addition to facilities with a connection to the BAD Site, Request No. 2 purports to also seek information regarding *any* facility located in California (excluding locations where ONLY clerical/office work was performed) and *any* facility located outside of California that shipped drums or other containers to *any* location in California, even to locations other than the BAD Site. As set forth above, these other facilities have no nexus with the BAD Site, and thus this request seeks information that is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections, HP states that, upon information and belief and based on the only records that HP is aware exists regarding HP transactions with BAD (attached hereto as Exhibit B), the following HP facilities on one or more occasions shipped empty drums to, or received empty drums from, the BAD Site:

- 1) 395 Page Mill Road, Palo Alto, CA
- 2) 3215 Porter Drive a/k/a Building 15, Palo Alto, CA
- 3) 974 E. Arques, Sunnyvale, CA.

3. *Provide a brief description of the nature of HP's operations at each Facility identified in your response to Question 2 (the "Facilities") including:*

- a. the date such operations commenced and concluded; and*
- b. the types of work performed at each location over time, including but not limited to the industrial, chemical, or institutional processes undertaken at each location.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request seeks information that is not relevant to the Site. Moreover, to the extent that the only information available at this time (long after the transactions at issue and the conclusion of

Fox Rothschild ^{LLP}
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 7

extensive prior inquiries into responsibility for hazardous substances at the BAD Site) is that HP sent empty drums to the BAD Site, this request seeks information that is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections, HP responds to this question to the extent it applies to the facilities identified in response to question 2 above, as follows:

1. 395 Page Mill Road, Palo Alto, CA – Electronic equipment manufacturing and assembly from 1942 until 1996.
2. 3215 Porter Drive, Palo Alto, CA – Printed circuit board manufacturing and assembly from 1964 to 1987 and, until 1973, the manufacturing and assembly of other electronic devices.
3. 974 E. Arques, Sunnyvale, CA –Electronics fabrication and assembly from 1972 through 1993.
4. *For each Facility, describe the types of records regarding the storage, production, purchasing, and use of Substances of Interest ("SOI") during the Relevant Time Period that still exist and the periods of time covered by each type of record.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome to the extent it seeks to require HP to describe types of records and other information regarding all SOI over the Relevant Time Period.

Notwithstanding the foregoing, and without any waiver of its objections, as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the time of HP's transactions with BAD, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's on-site treatment systems. Prior to shipment, the drums would be manually rinsed with water. Pursuant to HP's document retention policy, contemporaneous records regarding procurement of SOI at the HP locations identified in response to Request No. 2, above, would not have been retained.

5. *Did HP ever (not just during the Relevant Time Period) produce, purchase, use, or store one of the COCs (including any substances or wastes containing the COCs) at any of the Facilities? State the factual basis for your response.*

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 8

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By removing any temporal limit and any nexus between COCs at HP's facilities and the BAD Site, Request No. 5 purports to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's on-site treatment systems. Prior to shipment, the drums would be manually rinsed with water. Pursuant to HP's document retention policy, contemporaneous records regarding the procurement of SOI at the HP locations identified in response to Request No. 2, above, would not have been retained by HP.

6. *If the answer to Question 5 is yes, identify each COC produced, purchased, used, or stored at each Facility.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By removing any temporal limit and any nexus between COCs at HP's facilities and the BAD Site, Request Nos. 5 and 6 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 5.

7. *If the answer to Question 5 is yes, identify the time period during which each COC was produced, purchased, used, or stored at each Facility.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By removing any temporal limit and any nexus between COCs at HP's facilities and the BAD Site, Request

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 9

Nos. 5 and 7 purport to seek information from HP that is not relevant to contamination at the Site. Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 5.

8. *If the answer to Question 5 is yes, identify the average annual quantity of each COC produced, purchased, used, or stored at each Facility.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By removing any temporal limit and any nexus between COCs at HP's facilities and the BAD Site, Request Nos. 5 and 8 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 5.

9. *If the answer to Question 5 is yes, identify the volume of each COC disposed by the Facility annually and describe the method and location of disposal.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By removing any temporal limit and any nexus between COCs at HP's facilities and the BAD Site, Request Nos. 5 and 9 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 5.

10. *Did HP ever (not just during the Relevant Time Period) produce, purchase, use, or store hydraulic oil or transformer oil at any of the Facilities? State the factual basis for your response to this question.*

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 10

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope. By removing any temporal limit and any nexus between hydraulic fuel or transformer oil at HP's facilities and the BAD Site, Request No. 10 purports to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, there is no evidence that any hydraulic oil or transformer oil was taken to the BAD Site from an HP location. As set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Prior to shipment, the drums would be manually rinsed with water.

11. *If the answer to Question 10 is yes, identify each specific type of hydraulic oil and transformer oil produced, purchased, used, or stored at each Facility.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope and unauthorized by law to the extent it is overbroad. By removing any temporal limit and any nexus between hydraulic fuel or transformer oil at HP's facilities and the BAD Site, Request Nos. 10 and 11 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 10.

12. *If the answer to Question 10 is yes, identify the time period during which each type of hydraulic oil and transformer oil was produced, purchased, used, or stored.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope and unauthorized by law to the extent it is overbroad. By removing any temporal limit and any nexus between hydraulic fuel or transformer oil at HP's facilities and the BAD Site, Request Nos. 10 and 12 purport to seek information from HP that is not relevant to contamination at the Site.

Fox Rothschild ^{LLP}
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 11

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 10.

13 If the answer to Question 10 is yes, identify the average annual quantity of each type hydraulic oil and transformer oil purchased, produced, used, or stored at each Facility.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope and unauthorized by law to the extent it is overbroad. By removing any temporal limit and any nexus between hydraulic fuel or transformer oil at HP's facilities and the BAD Site, Request Nos. 10 and 13 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 10.

14. If the answer to Question 10 is yes, identify the volume of each hydraulic oil and transformer oil disposed by the Facility annually and describe the method and location of disposal.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope and unauthorized by law to the extent it is overbroad. By removing any temporal limit and any nexus between hydraulic fuel or transformer oil at HP's facilities and the BAD Site, Request Nos. 10 and 14 purport to seek information from HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's response to Request No. 10.

15. Provide the following information for each SOI (SOIs include any substance or waste containing the SOI) identified in your responses to Questions 5 and 10:

- a. Describe briefly the purpose for which each SOI was used at the Facility. If there was more than one use, describe each use and the time period for each use;*

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 12

- b. Identify the supplier(s) of the SOIs and the time period during which they supplied the SOIs, and provide copies of all contracts, service orders, shipping manifests, invoices, receipts, canceled checks and other documents pertaining to the procurement of the SOI;*
- c. State whether the SOIs were delivered to the Facility in bulk or in closed containers, and describe any changes in the method of delivery over time;*
- d. Describe how, where, when, and by whom the containers used to store the SOIs (or in which the SOIs were purchased) were cleaned, removed from the Facility, and/or disposed of, and describe any changes in cleaning, removal, or disposal practices over time.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. Request No. 15 purports to seek information HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, see HP's responses to Request Nos. 5 and 10.

16. For each SOI delivered to the Facilities in closed containers, describe the containers, including but not limited to:

- e. the type of container (e.g. 55 gal. drum, tote, etc.);*
- f. whether the containers were new or used; and*
- g. if the containers were used, a description of the prior use of the container.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. Request No. 16 purports to seek information HP that is not relevant to contamination at the Site.

Notwithstanding the foregoing, and without any waiver of its objections, this Request seeks detailed information of a type not retained within HP for a period of time that extends

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 13

from more than twenty to almost seventy years ago. Pursuant to HP's document retention policy, contemporaneous records regarding containers would not have been retained by HP.

17 For each container that HP used to store a SOI or in which SOIs were purchased ("Substance-Holding Containers" or "SHCs") that was later removed from the Facility, provide a complete description of where the SHCs were sent and the circumstances under which the SHCs were removed from the Facility. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in HP's practices over time.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome HP. Additionally, as stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 17 purports to seek information regarding SHCs that were sent to sites other than the BAD Site. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections, this Request seeks detailed information of a type not retained within HP for a period of time that extends from more than twenty to almost seventy years ago. Pursuant to HP's document retention policy, contemporaneous records regarding containers would have not have been retained by HP.

18. For each SHC that was removed from the Facility, describe HP's contracts, agreements, or other arrangements under which SHCs were removed from the Facility, and identity all parties to each contract, agreement, or other arrangement described. Distinguish between the Relevant Time Period and the time period since 1988.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, and unduly burdensome. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 18 purports to seek information regarding SHCs that were sent to sites other than the BAD Site. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site.

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 14

Notwithstanding the foregoing, and without any waiver of its objections, this Request seeks detailed information of a type not retained within HP for a period of time that extends from more than twenty to almost seventy years ago. Pursuant to HP's document retention policy, contemporaneous records regarding agreements would not have been retained by HP.

19. *For each SHC, provide a complete explanation regarding the ownership of the HC prior to delivery, while onsite, and after it was removed from the Facility. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in HP's practices over time.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. HP further objects to Request No. 19 as it assumes that each SHC is somehow individually identified, tracked, and used and reused by the same entity throughout the life of the SHC. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 19 seeks information regarding SHCs that were sent to sites other than the BAD Site.

Notwithstanding the foregoing, and without any waiver of its objections, this Request seeks detailed information of a type not retained within HP for a period of time that extends from more than twenty to almost seventy years ago. Pursuant to HP's document retention policy, contemporaneous records regarding ownership of containers, if they ever existed, would not have been retained by HP.

20. *Identify all individuals who currently have, and those who have had, responsibility for procurement of Materials at the Facilities. Also provide each individual's job title, duties, dates performing those duties, current position or the date of the individual's resignation, and the nature of the information possessed by each individual concerning HP's procurement of Materials.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. Request No. 20 seeks information relating to HP's facilities that is not relevant to contamination at the Site. HP further objects to Request No. 20 as it seeks information regarding procurement of "Materials" at facilities other than those sent to the BAD Site and thus goes beyond the

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 15

specific chemicals for which EPA purports to have evidence of a release or threatened release to the environment.

Notwithstanding the foregoing, and without any waiver of its objections, this Request seeks detailed information of a type not retained within HP for a period of time that extends from more than twenty to almost seventy years ago. Pursuant to HP's document retention policy, contemporaneous records regarding the identity of individuals with relevant procurement responsibilities would not have been retained by HP.

21. Describe how each type of waste containing any SOIs was collected and stored at the Facilities prior to disposal/recycling/sale/transport, including:

- h. the type of container in which each type of waste was placed/stored;*
- i. how frequently each type of waste was removed from the Facility; Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in HP's practices over time.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 21 purports to seek information regarding collection and storage of "any SOIs" at facilities other than the BAD Site. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site. Further, this Request seeks detailed information for a period of time that extends from more than twenty to almost seventy years ago, and such information would not have been retained.

Notwithstanding the foregoing, and without any waiver of its objections, as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Prior to shipment, the drums would be manually rinsed with water.

22. Describe the containers used to remove each type of waste containing any SOIs from the Facilities, including but not limited to:

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator
January 8, 2010
Page 16

- j. the type of container (e.g. 55 gal. drum, dumpster, etc.);*
- k. the colors of the containers;*
- l. any distinctive stripes or other markings on those containers;*
- m. any labels or writing on those containers (including the content of those labels);*
- n. whether those containers were new or used; and*
- o. if those containers were used, a description of the prior use of the container;*

Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in HP's practices over time.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. HP further objects to Request No. 22 as it assumes that each SHC is somehow individually identified, tracked, and used and reused by the same entity throughout the life of the SHC.

HP further objects to Request No. 22 as it purports to seek information regarding containers used to remove each type of waste containing any SOIs from the Facilities and taken to *any* other place during *any* time. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections, as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Prior to shipment the drums would be manually rinsed with water. Any records regarding procurement of those substances would no longer be in HP's possession, consistent with HP's document retention policy.

23. *For each type of waste generated at the Facilities that contained any of the SOIs, describe HP's contracts, agreements, or other arrangements for its disposal, treatment, or recycling and identify all parties to each contract, agreement, or other arrangement described. State the ownership of waste containers as specified under each contract, agreement, or other*

Page 17

arrangement described and the ultimate destination or use for such containers. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in HP's practices over time.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." HP objects to Request No. 23 as it purports to seek information relating to hazardous substances beyond the specific chemicals for which EPA purports to have evidence of a release or threatened release to the environment at the Site and that is not relevant to the Site.

Additionally, HP objects to Request No. 23 as it purports to seek information regarding waste generated at any Facilities that contained any SOIs and taken to *any* other place during *any* time. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections, as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Prior to shipment the drums would be manually rinsed with water. Pursuant to HP's Document Retention policy, documents responsive to this Request would not be retained by HP.

24. *Identify all individuals who currently have, and those who have had, responsibility for HP's environmental matters (including responsibility for the disposal, treatment, storage, recycling, or sale of HP's wastes and SHCs). Provide the job title, duties, dates performing those duties, supervisors for those duties, current position or the date of the individual's resignation, and the nature of the information possessed by such individuals concerning HP's waste management.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. Identifying all individuals who currently have, and those who have had, responsibility for HP's

Fox Rothschild ^{LLP}

Craig Whitenack, Civil Investigator

January 8, 2010

Page 18

environmental matters at all of HP's Facilities, including those that have no nexus to the BAD Site, seeks information that is overly broad and not relevant to HP's use of the BAD Site.

25. *Did HP ever purchase drums or other containers from a drum recycler or drum reconditioner? If yes, identify the entities or individuals from which HP acquired such drums or containers.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. By way of further answer and without waiving its objections, yes. See the documents attached in Exhibit B, which indicate that HP may have purchased drums from Bay Area Drum Co., Inc.

26. *Prior to 1988, did HP always keep its waste streams that contained SOIs separate from its other waste streams?*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. HP further objects to Request No. 26 as it purports to seek information relating to hazardous substances beyond the specific chemicals for which EPA purports to have evidence of a release or threatened release to the environment at the Site and that is not relevant to the Site.

Notwithstanding the foregoing, and without any waiver of its objections as set forth in the July 30, 1992 response to DTSC, under HP's standard procedures in effect during the relevant time period, the substances contained in drums would be used in HP's operations, and would thereafter be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Prior to shipment the drums would be manually rinsed with water. By way of further response, Request 26, as written, is virtually impossible to answer.

27. *Identify all removal and remedial actions conducted pursuant to the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. § 9601 et seq., or comparable state law; all corrective actions conducted pursuant to the Resource Conservation and Recovery Act, 42 U.S.C. § 6901 et seq.; and all cleanups conducted pursuant to the Toxic Substances Control Act, 15 U.S.C. § 2601 et seq. where (a) one of the COCs was addressed by the cleanup and (b) at which HP paid a portion of cleanup costs or performed work. Provide*

Fox Rothschild LLP
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 19

copies of all correspondence between HP and any federal or state government agency that (a) identifies a COC and (b) is related to one of the above-mentioned sites.

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 27 purports to seek information regarding a broad range of removal and remedial actions, corrective actions and cleanups which are not relevant to the BAD Site. Moreover, identifying all such removal and remedial actions is not feasible. To the extent that EPA seeks information about facilities that have no nexus with the BAD Site, this request is not relevant to the Site.

28. *Provide all records of communication between HP and Bay Area Drum Company, Inc.; Meyers Drum Company; A.W. Sorich Bucket and Drum Company; Waymire Drum Company, Inc.; Waymire Drum and Barrel Company, Inc.; Bedini Barrels Inc.; Bedini Steel Drum Corp.; Bedini Drum; or any other person or entity that owned or operated the facility located at 1212 Thomas Avenue, in the City and County of San Francisco, California.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome.

By way of further answer and without waiving its objections, after an internal search for non-privileged communications related to Bay Area Drum Company, Inc., see the documents attached at Exhibit B.

29. *Identify the time periods regarding which HP does not have any records regarding the SOI's that were produced, purchased, used, or stored at the Facilities.*

RESPONSE:

In addition to the General Objections set forth above, HP objects to this request as overbroad in scope, unauthorized by law to the extent it is overbroad, and unduly burdensome.

30. *Provide copies of all documents containing information responsive to the previous twenty-nine questions and identify the questions to which each document is responsive.*

Fox Rothschild ^{LLP}
ATTORNEYS AT LAW

Craig Whitenack, Civil Investigator

January 8, 2010

Page 20

RESPONSE:

In addition to the General Objections set forth above, HP objects to Request No. 30 as being overly broad, unduly burdensome, and seeking information that is not relevant to the BAD Site. By way of further answer and without waiving its objections, as a result of a diligent internal search for documents relating to the BAD Site, HP has no relevant information beyond the documents attached hereto.

Any questions EPA may have regarding the responses to these information requests may be directed to my attention.

Sincerely,

Sharon Oras Morgan

Attention: Mr. William Motmans, Jr., Special Investigator

Re: Bay Area Drum Site, San Francisco

DEPARTMENT OF TOXIC
SUBSTANCES CONTROL
"OFFICIAL FILE COPY"

Dear Sirs:

Further to several conversations with Mr. William Motmans and my letter of May 29, 1992 to Ms. Barbara J. Cook, this letter is in response to Mr. Motmans' letter of May 8, 1992 to Ms. Patricia Goughan of Hewlett-Packard Company ("HP") concerning the Bay Area Drum Site (the "Site").

All the responses below are correct to the best of my information and belief. The numbering below refers to the specific requests for information as set forth in Mr. Motmans' letter.

1. The approximate number of drums shipped to the Site through 1987.

From the copies of such materials as invoices, vouchers, and receiving tickets made available to HP by DTSC, it appears that HP shipped a total of 844 drums to the Site during the years 1982 through 1987. HP has not located any internal records of shipments to the Site for any year prior to 1985, nor has HP located internal records of any shipments to the Site other than those relating to the 844 drums referred to above.

2. The nature of the substances contained in the drums referred to above.

As described more fully in paragraph 6 below, HP believes that all the drums referred to above were empty at the time HP shipped them to the Site. Prior to that, it appears that some drums contained aqueous solutions with metals, acids, and/or non-halogenated organic liquids, and others probably contained oil, coolants, and/or detergents.

DEPARTMENT OF TOXIC
SUBSTANCES CONTROL
"OFFICIAL FILE COPY"

3. The type and capacity of each drum referred to above.

It appears that all such drums had a capacity of fifty-five gallons and were either "closed head steel", "open head steel", or "closed head polyethylene" drums.

4. The disposition of the drums above after the substances therein were used.

All of the drums referred to above were shipped by HP to the Site for reconditioning or disposal.

5. The residual level in each drum referred to above.

As discussed more fully in paragraph 6 below, HP believes that each of the drums referred to above was empty at the time of shipment to the Site.

6. Methods used to determine the residual levels in each drum referred to above.

Under HP's standard procedures in effect during the period 1982 through 1987, the substances contained in drums would be used in HP's manufacturing or other operations. Afterward, the drums would be tipped and drained completely into piping which would carry residuals to HP's treatment systems. Finally, the drums would be manually rinsed with water prior to shipment to the Site.

7. Were drums sent to the Site for reconditioning or disposal?

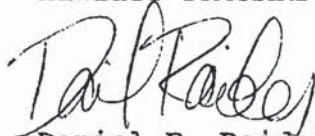

HP has no direct knowledge of Bay Area Drum Company's treatment of the drums, but we believe that the steel drums would have been reconditioned if their condition warranted it and otherwise scrapped for metal value, while the polyethylene drums generally would have been disposed of. No drums would have been sent by HP to the Site for any purpose other than reconditioning or disposal.

Please let me know if you have any further questions in connection with HP's involvement in the Site. My direct telephone number is (415) 857-2172 and my facsimile number is (415) 857-4392.

May 8, 1992

Ms. Patricia Goughan
Hewlett Packard
3000 Hanover Str., 20 BQ
Palo Alto, CA 94304

Dear Ms. Goughan:

This letter is to confirm our phone conversation of May 7, 1992 regarding Hewlett Packard's past business relationship with the Bay Area Drum Company (BADC) located at 1212 Thomas Avenue, San Francisco. Since our conversation this morning, I have learned that some of the drums identified at the BADC site during a December 13, 1983 Department inspection had originated from a Hewlett Packard facility at the following address: 974 E. Arques, Sunnyvale. The drums had an accumulation date of August 10, 1983 and were marked "waste solvents". These and other documents are available for viewing, which, as we discussed, can be arranged by contacting me at (916) 322-2831 or Monica Gan in our Berkeley office at (510) 540-3767. Enclosed, please find a representative sampling of documentation showing transactions between BADC and Hewlett Packard.

The Department is interested in the nature of transactions between your company and BADC. As previously discussed, the Department is specifically interested in the following:

1. The approximate number of drums shipped to BADC through 1987.
2. The nature of the substances contained in subject drums.
3. The type and capacity of each drum.
4. The disposition of subject drums after the substances were used.
5. The residual level in each drum after they were shipped offsite.
6. Methods used to determine the residual levels in each drum.
7. Were drums sent to the BADC for reconditioning or disposal?

Please provide responses to the aforementioned questions within thirty (30) days of this letter. Compliance with the information request set forth is mandatory pursuant to § 25185.6, 25358.1, and 25358.3 of the California Health and Safety Code.

Ms. Patricia Goughan

BERKELEY, CA 94710-2737

May 21, 1992

Ms. Patricia Goughan
Hewlett Packard
3000 Hanover Street, 20 BQ
Palo Alto, Ca 94304

Dear Ms. Goughan:

BAY AREA DRUM SITE, 1212 THOMAS AVENUE, SAN FRANCISCO, CALIFORNIA

The California Environmental Protection Agency, Department of Toxic Substances Control (Department) is spending public funds to investigate and conduct response actions to control releases and threatened releases of hazardous substances at the Bay Area Drum Site, a site listed on the priority list of the state "Superfund" sites pursuant to Health and Safety Code (H&SC) section 25356. The Site is located at 1212 Thomas Avenue, San Francisco, California. The purpose of this letter is as follows:

- (1) to inform you that the Department considers your company or organization a Potentially Responsible Party (PRP) at the site;
- (2) provide you with a brief description of the activities that have taken place to date at the Site and invite you to attend an informational meeting regarding the site's history and contamination.

Responsible parties under H&SC section 25323.5 include current and past owners and operators of facilities at which hazardous substances were disposed, as well as persons who arranged for disposal or treatment of hazardous substances sent to the Site, or persons who accepted hazardous substances for transport to the Site. The Department has information indicating that your company may be a Responsible Party. The Department believes that your company did by contract, agreement or other mechanism arrange for the disposal, treatment, or the transportation for disposal or treatment of hazardous substances at the Site during its operation from 1948 to 1987. For your information and to facilitate organization, we have enclosed the names of the other PRPs who have been notified to date.

Pursuant to sections 25355.5, 25358.3 and 25360 of the H&SC and other laws, responsible parties are obligated to finance or undertake actions that the Department determines are necessary to protect public health and welfare or the environment.

Responsible Parties are liable for the costs incurred by the State in responding to any release or threatened release at the site. Such costs can include expenditures for investigation, planning, cleanup and enforcement.

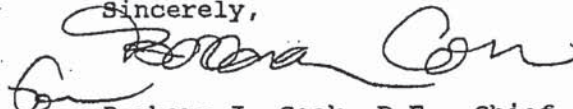

Also enclosed is a Fact Sheet which describes the background and proposed actions for the Site. The future activities to be completed by the Department are listed under the planned site activities section in this Fact Sheet. The Department has been involved in response activities at the Site since 1984 and has conducted extensive soil and groundwater investigations. An Expedited Response Action (ERA) was implemented in 1987 which directed the removal of contaminated soil and capping and fencing of the drum yard. The following remedial activities were completed in July, 1990.

The Department encourages cooperation by your company or organization with other PRPs and believes that a Responsible Party Committee is the best vehicle with which to adequately conduct work at the Site and satisfy the State's demand for costs. In order to facilitate negotiations with the other Responsible Parties in this matter and to provide additional information about the Site and respond to questions, the Department has scheduled a meeting to be held on June 4, 1992 at 1:00 p.m. at 700 Heinz Avenue, Suite 200, Berkeley, California. Please arrange for yourself or your representative to attend this meeting. Please provide Monica Gan of the Department at (510) 540-3767 by close of business on June 1, 1992 with name(s) of individuals attending this meeting on behalf of your company or organization.

For further information concerning technical issues, please contact Bill Brown at (510) 540-3841. For any legal questions, please contact Susan Bertken, Senior Staff Attorney, Toxics Legal Office at (408) 429-0113.

Sincerely,

Barbara J. Cook, P.E., Chief
Site Mitigation Branch

Re: Bay Area Drum Site

Dear Ms. Cook:

This will confirm my conversation earlier today with Ms. Monica Gan of your office in which we agreed to an extended due date of July 31, 1992 for Hewlett-Packard to respond to the DTSC's letter of inquiry from Mr. William Motmans dated May 8, 1992.

As I explained to Ms. Gan, HP is conducting an internal inquiry involving numerous sites in order to provide an appropriately thorough response to Mr. Motmans' letter and the additional time is necessary to complete the inquiry. Also, we are looking forward to the opportunity within the near future to review the documentation in Berkeley which the DTSC has made available to interested parties.

I'd like to extend sincere thanks for the DTSC's courtesy in this matter.

May I also request that all future correspondence from the DTSC to Hewlett-Packard concerning the Bay Area Drum site be directed both to Mr. Stewart Crook and to the undersigned at the following addresses:

Mr. Stewart Crook
Environmental Specialist
Hewlett-Packard Company
974 E. Arques Ave., MS 70AB
